They can talk to Suzette Melendez who is the legal counsel for the Governing Board. I understand that your staff has already coordinated a call tomorrow at noon in which I will participate.

hi laura: I hope you are well. I thought you should see the attached letter. AES Puerto Rico is threatening the municipality of guayama and the current and former mayor (in their personal and official capacities) for \$2.5 million for the local ordinance that restricts the use of coal ash in the community. Who is the most senior person on your staff that my staff can talk to about ongoing work we are doing related to coal ash in Puerto Rico.

Thanks
Judith
